

Anleitung zur Erstellung eines Passwortes für den internen Bereich

1. Folgendem Link nutzen: <http://www.htaccesstools.com/htpasswd-generator/>
2. Username eingeben (eigene Email-Adresse)
3. gewünschtes Passwort eingeben

Htpasswd Generator

Use the htpasswd generator to create passwords for htpasswd files. Just enter username and password and an entry for a htpasswd file is generated. You can use the [htacces Authentication generator](#) to create a htaccess file that will password protect your site or a directory. This htpasswd generator creates passwords that are hashed using the MD5 algorithm, which means that you can use it for sites hosted on any platform, including Windows and Linux.

Username
Enter the username you would like to add to your .htpasswd file.

Password
Enter the password to be encrypted.

4. auf „Create .htpasswd file“ klicken

.htpasswd entry created
Copy the text below into your .htpasswd file.
Remember: One entry per line.

```
max.muster@email.de:$apr1$NtCtM/..$M9sH0sefd8nZ8StajsBae.
```

An arrow points from the bottom of the page towards the generated text in the text area.

5. Die generierte Zeile kopieren und an webmaster@cellertrialclub.de senden
